SKILLS & CERTIFICATES

- Java (Spring Boot, JUnit), Python (Flask, Django), C, C++, Javascript, SQL, MongoDB, Git, React, Operating Systems, Microservices, Backend, AWS, iOS/Android App Development, Agile, Docker
- **Certificates:** “Leading with Analytics and Artificial Intelligence” (Kellogg School of Management)

PROFESSIONAL EXPERIENCE

ACCENTURE (Management Consultant)

Philadelphia, PA

PNC Data Migration Lead

Nov 2019 - April 2024

- o Spearheaded PNC's enterprise data migration, coordinating with 30+ cross-functional stakeholders across architecture, operations, and legal teams to establish migration pathways and resolve 50+ system-critical bugs, ensuring successful implementation with zero downtime
- o Developed advanced data profiling processes using complex SQL queries, improving system quality by 8% through corrupt data identification and remediation
- o Streamlined data migration by leading functional mapping sessions and managing 5+ ETL developers using JIRA. Achieved successful go-live a week ahead of schedule

WAVLENGTH

Philadelphia, PA

Technical Product Manager

Oct 2018 - Nov 2021

Wavelength is a SMB SaaS platform for creative entrepreneurs that are independently scaling their design agencies

- o Led a team of 3 software engineers and 2 UI/UX designers to deliver 5+ features with scalable backend services and data infrastructure from ideation to launch. Utilized Figma for design collaboration and Git for version control
- o Architected system integrations and data flows between multiple services, improving product performance by 20% through quality assurance processes and automating testing frameworks
- o Reduced meeting frequency by 10% by effectively communicating long-term vision through state diagrams, process flows, business requirements, test cases, and issue tracking in JIRA

PROJECTS

Afrotech AI Hackathon (Winner) *(Translating bloodwork results into actionable next steps)*

- o **Impact:** Empowering patients to take control of their health through insights from bloodwork results
- o **Challenge:** Implementing secure data handling protocols for sensitive medical information *(completed)*
- o **Motivation:** a) Desired insight on lab reports results, b) Opportunity to collaborate with technologists
- o **Features:** Lab Report Analysis, AI Chatbot *(frontend + backend utilized 5,000+ lines of code)*
- o **Technologies:** Frontend - React.js/Next.js | Backend - Flask | Misc - OpenAI Assistants API

Personal Finance *(Monthly Spending Report Generation via Bank/Credit Card Statements)*

- o **Impact:** 48+ hours saved of manual accounting per year
- o **Challenge:** Translating CSV files from various sources into a universal format *(completed)*
- o **Motivation:** Lack of time to produce detailed budgeting reports every month
- o **Features:** CSV processing of bank/credit card statements, Monthly spending report generation
- o **Technologies:** Python & Git

EDUCATION

THE PENNSYLVANIA STATE UNIVERSITY

State College, PA

Bachelor of Science (B.Sc.): Biomedical Engineering, Honors

May 2019
